

Citizen Science Opportunity
SOIL HEALTH SURVEY TRAINING
April 21th, 2017 – Jefferson City, MO

MO DIRT - Missourians Doing Impact Research Together, is a citizen science initiative to educate citizens on the importance of healthy soils and engage them in examining the current properties of our state soils and how these are being influenced by land use and climate change. The **soil health surveys** are conducted by volunteer citizens working as individuals or in small teams (~2-5 people). They measure indicators of soil health in sites that are representative of natural systems (prairie, forest, woodland) or agricultural systems (grassland, crop fields, pastures). Urban or suburban gardens are not included. The sites are monitored monthly between February and November for at least one year. Participants can join any time. The data is entered in a data portal by the participants. These data offers baseline information that is shared through an open access online website. We envision the data to be used by teachers to design lesson plans, farmers to decide land management strategies, and scientists to better understand soil-climate interactions.

WHEN: April 21st 2017, 9:30 am – 1:00 pm.

WHERE: Greenhouse at Lincoln University (743 Leslie Blvd, Jefferson City, MO 65101)

WHAT: Participants will learn about soil science, how to monitor soil health by measuring soil physical, chemical, and biological indicators, and how to contribute data.

WHO: Volunteer citizens (teachers, high school students, land owners, youth groups, etc.). Interested high school students are encouraged to attend the training even if their teachers cannot attend.

COST: Free

WHAT YOU WILL GET: If you decide to join the soil health surveys project you will receive a manual and a soil kit free of charge.

REGISTER AT: MODirt@danforthcenter.org; 314.587.1412
