

# Citizen Science Opportunity SOIL HEALTH SURVEY TRAINING

June 29<sup>th</sup>, 2017 – St. Charles Community College, MO

**MO DIRT - Missourians Doing Impact Research Together**, is a citizen science initiative to educate citizens on the importance of healthy soils and engage them in examining the current properties of our state soils and how these are being influenced by land use and climate change. The **soil health surveys** are conducted by volunteer citizens working as individuals or in small teams (~2-5 people). They measure indicators of soil health in sites that are representative of natural systems (prairie, forest, woodland) or agricultural systems (grassland, crop fields, pastures). Urban or suburban gardens are not included. The sites are monitored monthly between February and November for at least one year. Participants can join any time. The data is entered in a data portal by the participants. These data offers baseline information that is shared through an open access online website. We envision the data to be used by teachers to design lesson plans, farmers to decide land management strategies, and scientists to better understand soil-climate interactions.

**WHEN:** June 29<sup>th</sup> 2017, 10:00 am – 12:00 pm.

**WHERE:** Daniel J. Conoyer Social Sciences Building (SSB), Room 1201, St. Charles Community College, 4601 Mid Rivers Mall Dr., Cottleville, MO 63376.

**WHAT:** Participants will learn about soil science, how to monitor soil health by measuring soil physical, chemical, and biological indicators, and how to contribute data.

**WHO:** Volunteer citizens (teachers, high school students, land owners, youth groups, etc.).

**COST:** Free

**WHAT YOU WILL GET:** If you decide to join the soil health surveys project you will receive a manual and a soil kit free of charge.

**REGISTER AT:** [MODirt@danforthcenter.org](mailto:MODirt@danforthcenter.org); 314.587.1412
