

MO DIRT – Data Portal Workshop

January 17th, 2017

Weldon Spring Interpretive Center, MO

MO DIRT - Missourians Doing Impact Research Together, a citizen science program, is offering its first data portal workshop to help soil health survey participants store on-line the data they have collected.

During the workshop, participants will practice entering data in the four forms of the portal: Group Information, Site Description, Monthly Data Collection, and Twice a Year Data Collection. In addition, participants will have the opportunity to enter their own data.

WHEN: January 17th, 2017, 10:00 – 11:00 am (workshop); 11:00 am – 12:00 pm (data entry).

WHERE: Weldon Spring Site Interpretive Center, 7295 Highway 94 South, St. Charles, MO 63304.

WHO: Citizens conducting soil health surveys in the state of Missouri as part of the MO DIRT program.

COST: Free

WHAT TO DO BEFORE THE TRAINING: Create your MO DIRT account at modirt.missouriepscor.org/soilhealthsurveys/soilsurveydataentry. Only use the name of a participant of a soil health survey training. Request the account a couple of days before the training because an e-mail verification is required.

WHAT TO BRING: A laptop or a tablet. Wi-Fi is available at the site.

REGISTER AT: MODirt@danforthcenter.org or call 314.587.1412

VISIT OUR WEBSITE AT: modirt.missouriepscor.org

TOUR: After the training, participants are invited to visit the Weldon Spring Site, a remediation site from the Department of Energy with a 75-foot-tall (23 m) permanent disposal cell (www.lm.doe.gov/Weldon/).
